

# AMISTCO® Separation Products, Inc

AMISTCO Separation Products, Inc. Provides engineered solutions for a wide range of phase contracting and separation applications. In addition to mist eliminators and liquid-liquid coalescers, our products include trays, structured and random packings, catalyst bed supports, coalescing filters, hardware consignment trailers, and wedge wire screens.

We also fabricate numerous subassemblies and turnkey separation packages for primary contractors and end users Worldwide

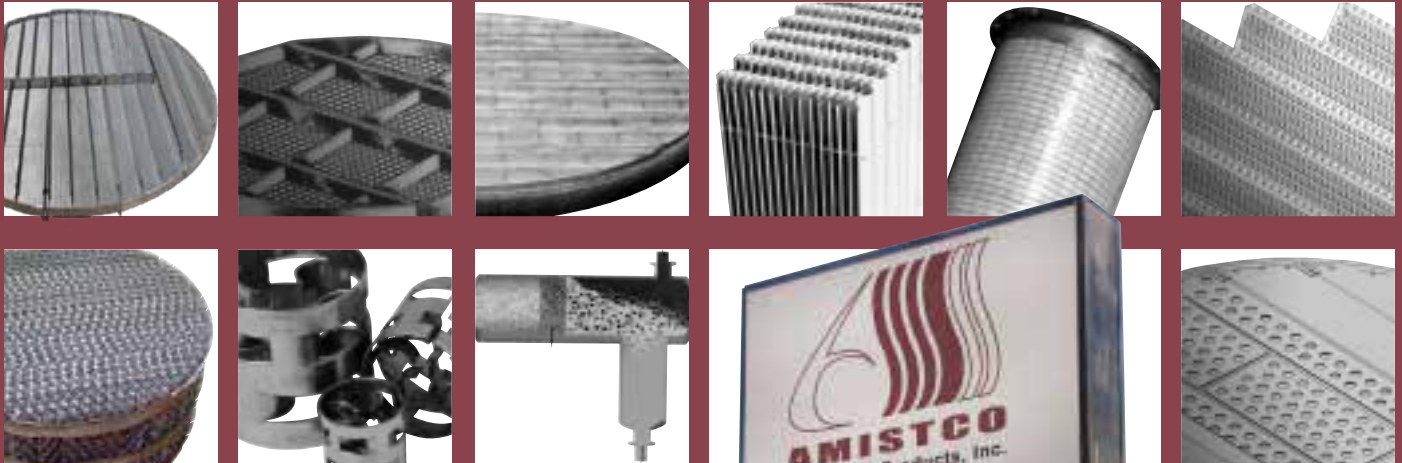

AMISTCO began manufacturing knitted wire mesh mist eliminators in Alvin, Texas, in 1991. with an ever expanding range of products, AMISTCO has 70,000 sq. ft. of manufacturing capacity.

Our success is built on prompt and consistent customer service. From the procurement of materials to delivery of finished products, each phase of manufacturing is closely monitored to assure that customer specifications and performance requirements are satisfied or exceeded. AMISTCO separation specialists are readily available to assist customers with technical design questions.

AMISTCO products are sold worldwide through a network of marketing representatives. For the location of your nearest representative, contact AMISTCO or visit our website at [www.amistco.com](http://www.amistco.com)
